Analysis report for sample: 9864357588022847c1e33e788017ae5c

This report has been generated by a set of tools for semi-supervised behavioral analysis of executables.

More information about these reports at **http://www.vallejo.cc**.

This work is licensed under a Creative Commons Attribution 4.0 International License. To view a copy of this license visit http://creativecommons.org/licenses/by/4.0/.

Report classification: 998 (indicates the level of interest of the report, based on the amount of information collected about the sample).

Sample

•md5: 9864357588022847c1e33e788017ae5c

AV detections

- Microsoft: Trojan:Win32/Skeeyah.A!rfn
- Kaspersky: Trojan.Win32.Autoit.fhu
- Symantec: Trojan.Netweird.B
- Malwarebytes: Spyware.Agent.AutoIt

Original source url

- hxxp://ellatrujillo.com/wp-includes/ugonew.exe\n

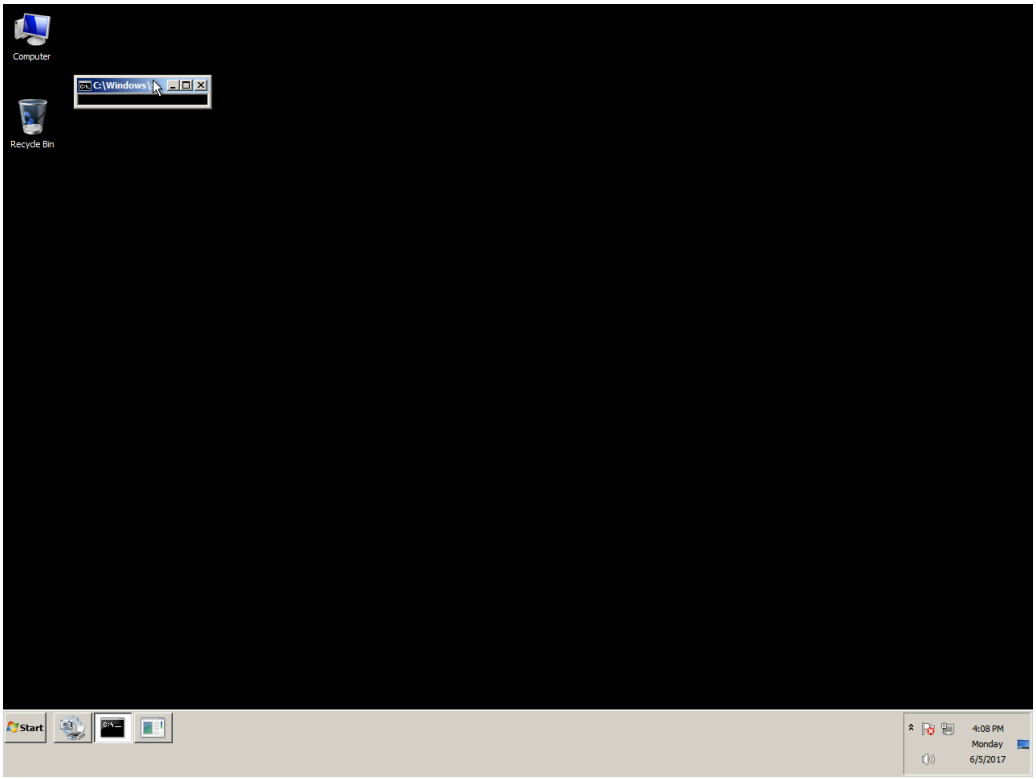
Virustotal url

- https://virustotal.com/es/file/3fb6199327407ef68901115a205bcece0880241351af5e705f1f8ac376bd9b78/analysis

Yara matches

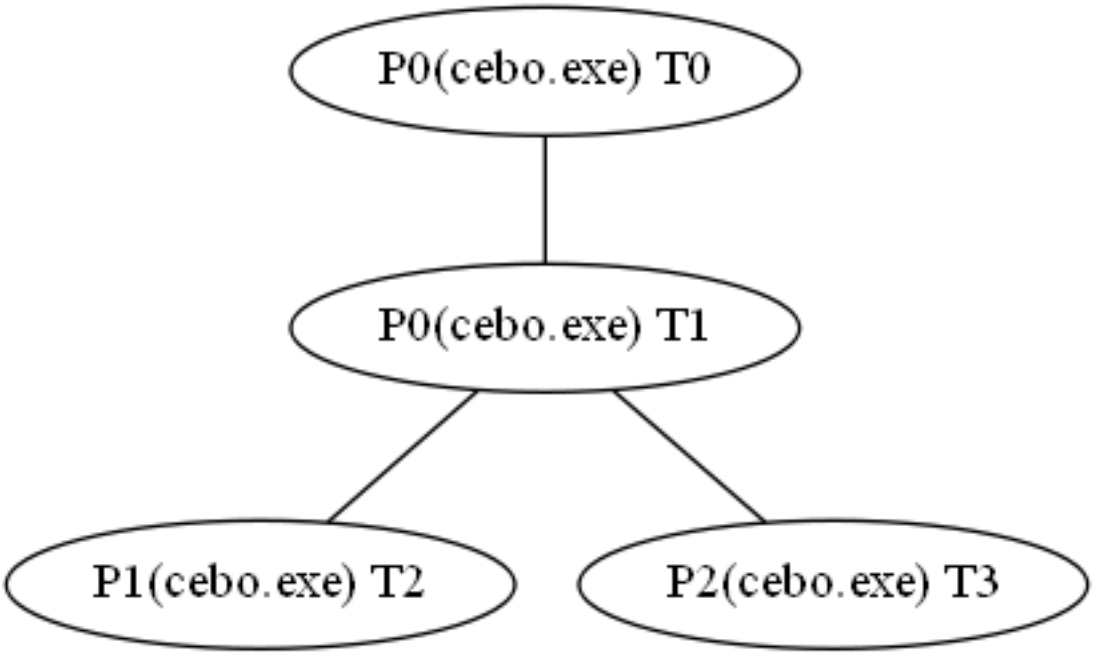
The following yara rules have matched injected or unpacked modules's code or data areas.

Snapshot



Threads tree

The following tree represents sample's threads. T<index> is an alias for sample's threads (numeration is done in the order of threads creation). P<index> is an alias for processes owning sample's threads.



Running processes

Here it is the list of running processes after sample execution.

Processes with sample' threads

- Name cebo.exe Alias P0
- Name cebo.exe Alias P1
- Name cebo.exe Alias P2

Other processes

- Name System
- Name smss.exe
- Name csrss.exe
- Name wininit.exe
- Name csrss.exe
- Name winlogon.exe
- Name services.exe
- Name lsass.exe
- Name lsm.exe
- Name svchost.exe
- Name svchost.exe
- Name svchost.exe
- Name svchost.exe
- Name svchost.exe
- Name audiodg.exe

- Name cmd.exe
- Name conhost.exe
- Name int3.exe

Most interesting actions

The following list it's a collection of the most interesting events captured. This list is ordered by the score assigned to the event. In the section "Threads behavioural information" it's possible to find all the actions performed by each sample's thread ordered chronologically.

- Process Create (C:\\Users\\javi\\Downloads\\cebo.exe PID: P1, Command line: "C:\\Users\\javi\\Downloads\\cebo.exe")
- Process Create (C:\\Users\\javi\\Downloads\\cebo.exe PID: P2, Command line: C:\\Users\\javi\\Downloads\\cebo.exe)

Most interesting strings

The following list it's a collection of the most interesting strings found in the sample's modules code or data. A complete list of strings for each sample's module can be found in the section "Sample's unpacked / injected modules."

Involved hosts

Dns queries

- 2.133.168.192.in-addr.arpa ---> no answers

Connections and readable network traffic

The analysis environment captures network traffic happened while sample execution. It classifies the traffic and tries to extract the most significant parts from the communications data.

In this section it's possible to find parts of the communication data that are easier to be read.

Threads behavioural information

In this section it's possible to find information about sample's threads, such as the actions performed by each sample's thread ordered chronologically.

- **Thread T0 (in process P0, cebo.exe) description**
  - **Thread's childs**
    - Thread T1 (in process P0, cebo.exe)
  - **Thread' events**
    - Thread Create (Thread ID: T1)
- **Thread T1 (in process P0, cebo.exe) description**
  - **Thread's childs**
    - Thread T2 (in process P1, cebo.exe)
    - Thread T3 (in process P2, cebo.exe)
  - **Thread' events**
    - Process Create (C:\\Users\\javi\\Downloads\\cebo.exe PID: P1, Command line: "C:\\Users\\javi\\Downloads\\cebo.exe")
    - Process Create (C:\\Users\\javi\\Downloads\\cebo.exe PID: P2, Command line: C:\\Users\\javi\\Downloads\\cebo.exe)
- **Thread T2 (in process P1, cebo.exe) description**
  - **Thread's childs**
  - **Thread' events**
    - Thread Create (Thread ID: TUNKALIAS)
- **Thread T3 (in process P2, cebo.exe) description**
  - **Thread's childs**
  - **Thread' events**
    - Thread Create (Thread ID: TUNKALIAS)

Malware processes' network events

The analysis environment tries to capture and collect network actions performed by sample's threads.

Sample's unpacked / injected modules

In this section it's possible to find information about sample's modules, such as the rich signatures, strings, yara rules matching the module,...

The analysis environment performs an heuristic search trying to find sample's injected or unpacked modules in memory, dumping and analyzing them.

• Module 1 (probably unpacked / injected by the sample)

• Module 1 rich signatures

• 44616e530000000000000000000000004651e100020000009ea0c700010000000d52df00330000000d52e000b10000000d52e100350000000978830009000000097893002500000000000010020020000b59eea0050000000b59edf00010000000d52db00010000000000970001000000b59ede00

• Module 1 other strings

• String missing closing quote.!Badly formated variable or macro.*Missing separator character after keyword.
• Unable to open the script file.
• Unable to parse line.
• Func reassign not allowed.*Func reassign on global level not allowed.
• Obsolete function/parameter.4Invalid Exitcode (reserved for AutoIt internal use).+Variable cannot be accessed in this manner.
• Assert Failed!
• Can not redeclare a constant.5Can not redeclare a parameter inside a user function.HCan pass constants by reference only to parameters with "Const" keyword.*Can not initialize a variable with itself.$Incorrect way to use this parameter.:"EndSwitch" statement with no matching "Switch" statement.>"Switch" statement is missing "EndSwitch" or "Case" statement.H"ContinueCase" statement with no matching "Select"or "Switch" statement.
• 3This keyword cannot be used after a "Then" keyword.>"Select" statement is missing "EndSelect" or "Case" statement.+"If" statements must have a "Then" keyword. Badly formated Struct statement."Cannot assign values to constants..Cannot make existing variables into constants.9Only Object-type variables allowed in a "With" statement.v"long_ptr", "int_ptr" and "short_ptr" DllCall() types have been deprecated. Use "long*", "int*" and "short*" instead.-Object referenced outside a "With" statement.)Nested "With" statements are not allowed."Variable must be of type "Object".1The requested action with this object has failed.8Variable appears more than once in function declaration.2ReDim array can not be initialized in this manner.1An array variable can not be used in this manner.
• Badly formated Enum statement
• Invalid file filter given.*Expected a variable in user function call.1"Do" statement has no matching "Until" statement.2"Until" statement with no matching "Do" statement.#"For" statement is badly formatted.2"Next" statement with no matching "For" statement.N"ExitLoop/ContinueLoop" statements only valid from inside a For/Do/While loop.1"For" statement has no matching "Next" statement.@"Case" statement with no matching "Select"or "Switch" statement.:"EndSelect" statement with no matching "Select" statement.ORecursion level has been exceeded - AutoIt will quit to prevent stack overflow.&Cannot; make existing variables static.4Cannot make static variables into regular variables.
• Invalid element in a DllStruct.*Unknown option or bad parameter specified.&Unable; to load the internet libraries./"Struct" statement has no matching "EndStruct".HUnable to open file, the maximum number of open files has been exceeded.K"ContinueLoop" statement with no matching "While", "Do" or "For" statement.
• *Unable to get a list of running processes.
• Unknown macro.
• Unknown function name.
• Duplicate function name.

• Array maximum size exceeded.+"Func" statement has no matching "EndFunc".
• 0Expected a "=" operator in assignment statement.*Invalid keyword at the start of this line.
• Error parsing function call.0Incorrect number of parameters in function call.\"'ReDim" used without an array variable.>Illegal text at the end of statement (one statement per line).1"If" statement has no matching "EndIf" statement.1"Else" statement with no matching "If" statement.2"EndIf" statement with no matching "If" statement.7Too many "Else" statements for matching "If" statement.3"While" statement has no matching "Wend" statement.4"Wend" statement with no matching "While" statement.%Variable used without being declared.XArray variable has incorrect number of subscripts or subscript dimension range exceeded.#Variable subscript badly formatted.*Subscript used on non-accessible variable.&Too; many subscripts used for an array.0Missing subscript dimensions in "Dim" statement.NNo variable given for "Dim", "Local", "Global", "Struct" or "Const" statement.
• Error in expression.
• Missing operator in expression."Unbalanced brackets in expression.
• "With" missing "EndWith".(Missing right bracket \')\' in expression.
• "EndWith" missing "With".!Badly formatted "Func" statement.
• AutoIt supports the __stdcall (WINAPI) and __cdecl calling conventions. The __stdcall (WINAPI) convention is used by default but __cdecl can be used instead. See the DllCall() documentation for details on changing the calling convention.
• Stack corruption typically occurs when either the wrong calling convention is used or when the function is called with the wrong number of arguments.
• AutoIt has detected the stack has become corrupt.

- <program name unknown>
- Program:
- Runtime Error!
- runtime error
- TLOSS error
- SING error
- DOMAIN error
- - inconsistent onexit begin-end variables
- R6034
- This indicates a bug in your application. It is most likely the result of calling an MSIL-compiled (/clr) function from a native constructor or from DllMain.
- - Attempt to use MSIL code from this assembly during native code initialization
- R6033

- - not enough space for locale information
- R6032
- This indicates a bug in your application.
- - Attempt to initialize the CRT more than once.
- R6031
- - CRT not initialized
- R6030
- - unable to initialize heap
- R6028
- - not enough space for lowio initialization
- R6027
- - not enough space for stdio initialization
- R6026
- - pure virtual function call
- R6025
- - not enough space for _onexit/atexit table
- R6024
- - unable to open console device
- R6019

- parentheses are too deeply nested (stack check)
- group name must start with a non-digit
- invalid range in character class
- parentheses are too deeply nested
- missing opening brace after \\o
- non-octal character in \\o{} (closing brace missing?)
- non-hex character in \\x{} (closing brace missing?)
- setting UTF is disabled by the application
- invalid UTF-32 string
- character value in \\u.... sequence is too large
- name is too long in (*MARK), (*PRUNE), (*SKIP), or (*THEN)
- invalid UTF-16 string
- disallowed Unicode code point (>= 0xd800 && <= 0xdfff)
- too many forward references
- \\N is not supported in a class
- internal error: unknown opcode in find_fixedlength()
- \\k is not followed by a braced, angle-bracketed, or quoted name
- \\c must be followed by an ASCII character
- this version of PCRE is not compiled with Unicode property support
- (*MARK) must have an argument
- different names for subpatterns of the same number are not allowed
-] is an invalid data character in JavaScript compatibility mode
- digit expected after (?+
- subpattern name expected
- number is too big
- (*VERB) not recognized or malformed
- an argument is not allowed for (*ACCEPT), (*FAIL), or (*COMMIT)
- a numbered reference must not be zero
- \\g is not followed by a braced, angle-bracketed, or quoted name/number or by a plain number
- inconsistent NEWLINE options
- repeating a DEFINE group is not allowed
- DEFINE group contains more than one branch
- internal error: previously-checked referenced subpattern not found
- internal error: overran compiling workspace
- octal value is greater than \\377 in 8-bit non-UTF-8 mode
- repeated subpattern is too long
- too many named subpatterns (maximum 10000)
- subpattern name is too long (maximum 32 characters)
- unknown property name after \\P or \\p
- malformed \\P or \\p sequence
- support for \\P, \\p, and \\X has not been compiled
- invalid UTF-8 string
- two named subpatterns have the same name
- syntax error in subpattern name (missing terminator)
- unrecognized character after (?P
- recursive call could loop indefinitely
- closing) for (?C expected
- number after (?C is > 255
- PCRE does not support \\L, \\l, \\N{name}, \\U, or \\u
- \\C not allowed in lookbehind assertion
- invalid condition (?(0)
- character value in \\x{} or \\o{} is too large
- spare error
- this version of PCRE is compiled without UTF support
- POSIX collating elements are not supported
- unknown POSIX class name
- assertion expected after (?(

- conditional group contains more than two branches
- malformed number or name after (?(
- lookbehind assertion is not fixed length
- unrecognized character after (?<
- internal error: code overflow
- unmatched parentheses
- failed to get memory
- regular expression is too large
- parentheses nested too deeply
- missing) after comment
- unknown option bit(s) set
- erroffset passed as NULL
- reference to non-existent subpattern
- missing)
- POSIX named classes are supported only within a class
- unrecognized character after (? or (?-
- internal error: unexpected repeat
- operand of unlimited repeat could match the empty string
- nothing to repeat
- range out of order in character class
- invalid escape sequence in character class
- missing terminating] for character class
- number too big in {} quantifier

• Module 2 other strings

• String missing closing quote.!Badly formated variable or macro.*Missing separator character after keyword.
• Unable to open the script file.
• Unable to parse line.
• Func reassign not allowed.*Func reassign on global level not allowed.
• Obsolete function/parameter.4Invalid Exitcode (reserved for AutoIt internal use).+Variable cannot be accessed in this manner.
• Assert Failed!
• Can not redeclare a constant.5Can not redeclare a parameter inside a user function.HCan pass constants by reference only to parameters with "Const" keyword.*Can not initialize a variable with itself.$Incorrect way to use this parameter.:"EndSwitch" statement with no matching "Switch" statement.>"Switch" statement is missing "EndSwitch" or "Case" statement.H"ContinueCase" statement with no matching "Select"or "Switch" statement.
• 3This keyword cannot be used after a "Then" keyword.>"Select" statement is missing "EndSelect" or "Case" statement.+"If" statements must have a "Then" keyword. Badly formated Struct statement."Cannot assign values to constants..Cannot make existing variables into constants.9Only Object-type variables allowed in a "With" statement.v"long_ptr", "int_ptr" and "short_ptr" DllCall() types have been deprecated. Use "long*", "int*" and "short*" instead.-Object referenced outside a "With" statement.)Nested "With" statements are not allowed."Variable must be of type "Object".1The requested action with this object has failed.8Variable appears more than once in function declaration.2ReDim array can not be initialized in this manner.1An array variable can not be used in this manner.
• Badly formated Enum statement

• Invalid file filter given.*Expected a variable in user function call.1"Do" statement has no matching "Until" statement.2"Until" statement with no matching "Do" statement.#"For" statement is badly formatted.2"Next" statement with no matching "For" statement.N"ExitLoop/ContinueLoop" statements only valid from inside a For/Do/While loop.1"For" statement has no matching "Next" statement.@"Case" statement with no matching "Select"or "Switch" statement.:"EndSelect" statement with no matching "Select" statement.ORecursion level has been exceeded - AutoIt will quit to prevent stack overflow.&Cannot; make existing variables static.4Cannot make static variables into regular variables.
• Invalid element in a DllStruct.*Unknown option or bad parameter specified.&Unable; to load the internet libraries./"Struct" statement has no matching "EndStruct".HUnable to open file, the maximum number of open files has been exceeded.K"ContinueLoop" statement with no matching "While", "Do" or "For" statement.
• *Unable to get a list of running processes.
• Unknown macro.
• Unknown function name.
• Duplicate function name.
• Array maximum size exceeded.+"Func" statement has no matching "EndFunc".
• 0Expected a "=" operator in assignment statement.*Invalid keyword at the start of this line.
• Error parsing function call.0Incorrect number of parameters in function call.\"'ReDim" used without an array variable.>Illegal text at the end of statement (one statement per line).1"If" statement has no matching "EndIf" statement.1"Else" statement with no matching "If" statement.2"EndIf" statement with no matching "If" statement.7Too many "Else" statements for matching "If" statement.3"While" statement has no matching "Wend" statement.4"Wend" statement with no matching "While" statement.%Variable used without being declared.XArray variable has incorrect number of subscripts or subscript dimension range exceeded.#Variable subscript badly formatted.*Subscript used on non-accessible variable.&Too; many subscripts used for an array.0Missing subscript dimensions in "Dim" statement.NNo variable given for "Dim", "Local", "Global", "Struct" or "Const" statement.
• Error in expression.
• Missing operator in expression."Unbalanced brackets in expression.
• "With" missing "EndWith".(Missing right bracket \')\' in expression.
• "EndWith" missing "With".!Badly formatted "Func" statement.
• AutoIt supports the __stdcall (WINAPI) and __cdecl calling conventions. The __stdcall (WINAPI) convention is used by default but __cdecl can be used instead. See the DllCall() documentation for details on changing the calling convention.
• Stack corruption typically occurs when either the wrong calling convention is used or when the function is called with the wrong number of arguments.
• AutoIt has detected the stack has become corrupt.

- Microsoft Visual C++ Runtime Library

- <program name unknown>
- Program:
- Runtime Error!
- runtime error
- TLOSS error
- SING error
- DOMAIN error
- - inconsistent onexit begin-end variables
- R6034
- This indicates a bug in your application. It is most likely the result of calling an MSIL-compiled (/clr) function from a native constructor or from DllMain.
- - Attempt to use MSIL code from this assembly during native code initialization
- R6033
- - not enough space for locale information
- R6032
- This indicates a bug in your application.
- - Attempt to initialize the CRT more than once.
- R6031
- - CRT not initialized
- R6030
- - unable to initialize heap
- R6028
- - not enough space for lowio initialization
- R6027
- - not enough space for stdio initialization
- R6026
- - pure virtual function call
- R6025
- - not enough space for _onexit/atexit table
- R6024
- - unable to open console device
- R6019
- - unexpected heap error
- R6018
- - unexpected multithread lock error
- R6017
- - not enough space for thread data
- R6016
- - abort() has been called
- R6010
- - not enough space for environment
- R6009
- - not enough space for arguments
- R6008
- - floating point support not loaded
- R6002

- parentheses are too deeply nested (stack check)
- group name must start with a non-digit
- invalid range in character class
- parentheses are too deeply nested
- missing opening brace after \\o
- non-octal character in \\o{} (closing brace missing?)
- non-hex character in \\x{} (closing brace missing?)
- setting UTF is disabled by the application
- invalid UTF-32 string
- character value in \\u.... sequence is too large
- name is too long in (*MARK), (*PRUNE), (*SKIP), or (*THEN)
- invalid UTF-16 string
- disallowed Unicode code point (>= 0xd800 && <= 0xdfff)
- too many forward references
- \\N is not supported in a class
- internal error: unknown opcode in find_fixedlength()
- \\k is not followed by a braced, angle-bracketed, or quoted name
- \\c must be followed by an ASCII character
- this version of PCRE is not compiled with Unicode property support
- (*MARK) must have an argument
- different names for subpatterns of the same number are not allowed
-] is an invalid data character in JavaScript compatibility mode
- digit expected after (?+
- subpattern name expected
- number is too big
- (*VERB) not recognized or malformed
- an argument is not allowed for (*ACCEPT), (*FAIL), or (*COMMIT)
- a numbered reference must not be zero
- \\g is not followed by a braced, angle-bracketed, or quoted name/number or by a plain number
- inconsistent NEWLINE options
- repeating a DEFINE group is not allowed
- DEFINE group contains more than one branch
- internal error: previously-checked referenced subpattern not found
- internal error: overran compiling workspace
- octal value is greater than \\377 in 8-bit non-UTF-8 mode
- repeated subpattern is too long
- too many named subpatterns (maximum 10000)
- subpattern name is too long (maximum 32 characters)
- unknown property name after \\P or \\p
- malformed \\P or \\p sequence
- support for \\P, \\p, and \\X has not been compiled
- invalid UTF-8 string
- two named subpatterns have the same name
- syntax error in subpattern name (missing terminator)

- unrecognized character after (?P
- recursive call could loop indefinitely
- closing) for (?C expected
- number after (?C is > 255
- PCRE does not support \\L, \\l, \\N{name}, \\U, or \\u
- \\C not allowed in lookbehind assertion
- invalid condition (?(0)
- character value in \\x{} or \\o{} is too large
- spare error
- this version of PCRE is compiled without UTF support
- POSIX collating elements are not supported
- unknown POSIX class name
- assertion expected after (?(
- conditional group contains more than two branches
- malformed number or name after (?(
- lookbehind assertion is not fixed length
- unrecognized character after (?<
- internal error: code overflow
- unmatched parentheses
- failed to get memory
- regular expression is too large
- parentheses nested too deeply
- missing) after comment
- unknown option bit(s) set
- erroffset passed as NULL
- reference to non-existent subpattern
- missing)
- POSIX named classes are supported only within a class
- unrecognized character after (? or (?-
- internal error: unexpected repeat
- operand of unlimited repeat could match the empty string
- nothing to repeat
- range out of order in character class
- invalid escape sequence in character class
- missing terminating] for character class
- number too big in {} quantifier
- numbers out of order in {} quantifier
- unrecognized character follows \\
- \\c at end of pattern
- \\ at end of pattern
