Analysis report for sample: 00717e22dc53349775b93bddacdd33bf

This report has been generated by a set of tools for semi-supervised behavioral analysis of executables.

More information about these reports at **http://www.vallejo.cc**.

This work is licensed under a Creative Commons Attribution 4.0 International License. To view a copy of this license visit http://creativecommons.org/licenses/by/4.0/.

Report classification: 3598 (indicates the level of interest of the report, based on the amount of information collected about the sample).

Index

- Sample
- AV detections
- Original source url
- Virustotal url
- Yara matches
- Snapshot
- Threads tree
- Running processes
- Most interesting actions
- Most interesting strings
- Involved hosts
- Dns queries
- Connections and readable network traffic
- Threads behavioural information
- Malware processes' network events
- Sample's unpacked / injected modules

Sample

- md5: 00717e22dc53349775b93bddacdd33bf

AV detections

- Microsoft: Rogue:Win32/Winwebsec
- Kaspersky: Trojan-FakeAV.Win32.SmartFortress2012.avls
- Symantec: Trojan.FakeAV!gen119
- Malwarebytes: Rogue.FakeAV

Original source url

-

Virustotal url

- https://virustotal.com/es/file/60aaa970a591421a416d794a7872ced6d8661914ecd548d4851465a817fd060a/analysis

Yara matches

The following yara rules have matched injected or unpacked modules's code or data areas.

Snapshot

Threads tree

The following tree represents sample's threads. T<index> is an alias for sample's threads (numeration is done in the order of threads creation). P<index> is an alias for processes owning sample's threads.

Running processes

Here it is the list of running processes after sample execution.

Processes with sample' threads

- Name cebo.exe Alias P0

Other processes

- Name System
- Name smss.exe
- Name csrss.exe
- Name wininit.exe
- Name csrss.exe
- Name winlogon.exe
- Name services.exe
- Name lsass.exe
- Name lsm.exe
- Name svchost.exe
- Name svchost.exe
- Name svchost.exe
- Name svchost.exe
- Name svchost.exe
- Name audiodg.exe

Most interesting actions

The following list it's a collection of the most interesting events captured. This list is ordered by the score assigned to the event. In the section "Threads behavioural information" it's possible to find all the actions performed by each sample's thread ordered chronologically.

Most interesting strings

The following list it's a collection of the most interesting strings found in the sample's modules code or data. A complete list of strings for each sample's module can be found in the section "Sample's unpacked / injected modules."

Involved hosts

Dns queries

Connections and readable network traffic

The analysis environment captures network traffic happened while sample execution. It classifies the traffic and tries to extract the most significant parts from the communications data.

In this section it's possible to find parts of the communication data that are easier to be read.

Threads behavioural information

In this section it's possible to find information about sample's threads, such as the actions performed by each sample's thread ordered chronologically.

- **Thread T0 (in process P0, cebo.exe) description**
  - **Thread's childs**

Malware processes' network events

The analysis environment tries to capture and collect network actions performed by sample's threads.

Sample's unpacked / injected modules

In this section it's possible to find information about sample's modules, such as the rich signatures, strings, yara rules matching the module,...

The analysis environment performs an heuristic search trying to find sample's injected or unpacked modules in memory, dumping and analyzing them.

• Module 1 (probably unpacked / injected by the sample)

• Module 1 rich signatures

• 44616e530000000000000000000000000000000002000000f1c6cd001c000000f1c6ce00ba000000c2ecce0007000000f1c6cf00500000000097883000f0000000978930011000000000001002901000 0c2eccf0037000000c2ecc900010000000000970001000000c2eccc00

- mscoree.dll
- Microsoft Visual C++ Runtime Library
- <program name unknown>
- Program:
- Runtime Error!
- - floating point support not loaded
- ER6002
- runtime error
- TLOSS error
- SING error
- DOMAIN error
- - inconsistent onexit begin-end variables
- R6034
- This indicates a bug in your application. It is most likely the result of calling an MSIL-compiled (/clr) function from a native constructor or from DllMain.
- - Attempt to use MSIL code from this assembly during native code initialization
- R6033
- - not enough space for locale information
- R6032
- This indicates a bug in your application.
- - Attempt to initialize the CRT more than once.
- R6031

- - CRT not initialized
- R6030
- - unable to initialize heap
- R6028
- - not enough space for lowio initialization
- R6027
- - not enough space for stdio initialization
- R6026
- - pure virtual function call
- R6025
- - not enough space for _onexit/atexit table
- R6024
- - unable to open console device
- R6019
- - unexpected heap error
- R6018
- - unexpected multithread lock error
- R6017
- - not enough space for thread data
- R6016
- - abort() has been called
- R6010
- - not enough space for environment
- R6009
- - not enough space for arguments
- R6008
