Analysis report for sample: 4f851a9c8d9717ed4f172e6b3527a8b2

This report has been generated by a set of tools for semi-supervised behavioral analysis of executables.

More information about these reports at **http://www.vallejo.cc**.

This work is licensed under a Creative Commons Attribution 4.0 International License. To view a copy of this license visit http://creativecommons.org/licenses/by/4.0/.

Report classification: 17055 (indicates the level of interest of the report, based on the amount of information collected about the sample).

Index

- Sample
- AV detections
- Original source url
- Virustotal url
- Yara matches
- Snapshot
- Threads tree
- Running processes
- Most interesting actions
- Most interesting strings
- Involved hosts
- Dns queries
- Connections and readable network traffic
- Threads behavioural information
- Malware processes' network events
- Sample's unpacked / injected modules

Sample

•md5: 4f851a9c8d9717ed4f172e6b3527a8b2

AV detections

• Microsoft:
• Kaspersky:
• Symantec:
• Malwarebytes:

Original source url

• hxxp://anywhere.webrootcloudav.com/zerol/sysbbanalyzer.exe

Virustotal url

• https://virustotal.com/es/file/b32753162fa9fba8771e302675ec5739aa3925f19ae0871dec32e9d27933082d/analysis

Yara matches

The following yara rules have matched injected or unpacked modules's code or data areas.

Threads tree

The following tree represents sample's threads. T<index> is an alias for sample's threads (numeration is done in the order of threads creation). P<index> is an alias for processes owning sample's threads.

Running processes

Here it is the list of running processes after sample execution.

Processes with sample' threads

- Name cebo.exe Alias P0

Other processes

- Name System
- Name smss.exe
- Name csrss.exe
- Name wininit.exe
- Name csrss.exe
- Name winlogon.exe
- Name services.exe
- Name lsass.exe
- Name lsm.exe
- Name svchost.exe
- Name svchost.exe
- Name svchost.exe
- Name svchost.exe
- Name svchost.exe
- Name audiodg.exe
- Name TrustedInstaller.exe
- Name svchost.exe
- Name svchost.exe
- Name spoolsv.exe
- Name svchost.exe
- Name svchost.exe
- Name vmtoolse.exe
- Name svchost.exe
- Name dllhost.exe
- Name msdtc.exe
- Name sppsvc.exe
- Name taskhost.exe
- Name dwm.exe
- Name explorer.exe

- Name cmd.exe
- Name conhost.exe
- Name int3.exe

Most interesting actions

The following list it's a collection of the most interesting events captured. This list is ordered by the score assigned to the event. In the section "Threads behavioural information" it's possible to find all the actions performed by each sample's thread ordered chronologically.

- RegSetValue (HKLM\\SOFTWARE\\webroot\\initialOSBuildNumber Type: REG_DWORD, Length: 4, Data: 7601)

Most interesting strings

The following list it's a collection of the most interesting strings found in the sample's modules code or data. A complete list of strings for each sample's module can be found in the section "Sample's unpacked / injected modules."

- suspicious event or string: vssadmin
- suspicious event or string: bcdedit.exe

Involved hosts

Dns queries

- 2.133.168.192.in-addr.arpa ---> no answers

Connections and readable network traffic

The analysis environment captures network traffic happened while sample execution. It classifies the traffic and tries to extract the most significant parts from the communications data.

In this section it's possible to find parts of the communication data that are easier to be read.

Threads behavioural information

In this section it's possible to find information about sample's threads, such as the actions performed by each sample's thread ordered chronologically.

- **Thread T0 (in process P0, cebo.exe) description**
  - **Thread's childs**
    - Thread T1 (in process P0, cebo.exe)
  - **Thread' events**
    - Thread Create (Thread ID: T1)
- **Thread T1 (in process P0, cebo.exe) description**
  - **Thread's childs**
    - Thread T2 (in process P0, cebo.exe)
    - Thread T3 (in process P0, cebo.exe)
  - **Thread' events**
    - Thread Create (Thread ID: TUNKALIAS)
    - Thread Create (Thread ID: TUNKALIAS)
    - Thread Create (Thread ID: T2)
    - RegSetValue (HKLM\\SOFTWARE\\webroot\\initialOSBuildNumber Type: REG_DWORD, Length: 4, Data: 7601)
    - Thread Create (Thread ID: T3)
    - Thread Create (Thread ID: TUNKALIAS)
- **Thread T2 (in process P0, cebo.exe) description**
  - **Thread's childs**
    - Thread T4 (in process P0, cebo.exe)
  - **Thread' events**
    - Thread Create (Thread ID: T4)
- **Thread T3 (in process P0, cebo.exe) description**
  - **Thread's childs**
  - **Thread' events**
- **Thread T4 (in process P0, cebo.exe) description**
  - **Thread's childs**

- **Thread' events**
  - Thread Create (Thread ID: TUNKALIAS)

Malware processes' network events

The analysis environment tries to capture and collect network actions performed by sample's threads.

Sample's unpacked / injected modules

In this section it's possible to find information about sample's modules, such as the rich signatures, strings, yara rules matching the module,...

The analysis environment performs an heuristic search trying to find sample's injected or unpacked modules in memory, dumping and analyzing them.

• Module 1 (probably unpacked / injected by the sample)

• Module 1 rich signatures

• 44616e530000000000000000000000000097895001000000009789300040000 00c30f5d002200000027c66d000100000044519c00030000000000001002802 0000c30f5f000600000000097883004c00000009788400100000027c67e00010000000978940001000000097891 00

- Invalid parameter passed to C runtime function.
- Text only contains white space(s)
- Expect either an object or array at root
- Nothing should follow the root object or array.
- Name of an object member must be a string
- There must be a colon after the name of object member
- Must be a comma or '}' after an object member
- The second \\u in surrogate pair is invalid
- Missing the second \\u in surrogate pair
- Unknown escape character
- lacks ending quotation before the end of string
- Incorrect unescaped character in string
- Must be a comma or ']' after an array element.
- Number too big to store in double
- At least one digit in fraction part
- At least one digit in exponent
- Expect a value here.

- Invalid value
