Analysis report for sample: 0c179b3fb455695b417cb8c0c46f487d

This report has been generated by a set of tools for semi-supervised behavioral analysis of executables.

More information about these reports at **http://www.vallejo.cc**.

This work is licensed under a Creative Commons Attribution 4.0 International License. To view a copy of this license visit http://creativecommons.org/licenses/by/4.0/.

Report classification: 4020 (indicates the level of interest of the report, based on the amount of information collected about the sample).

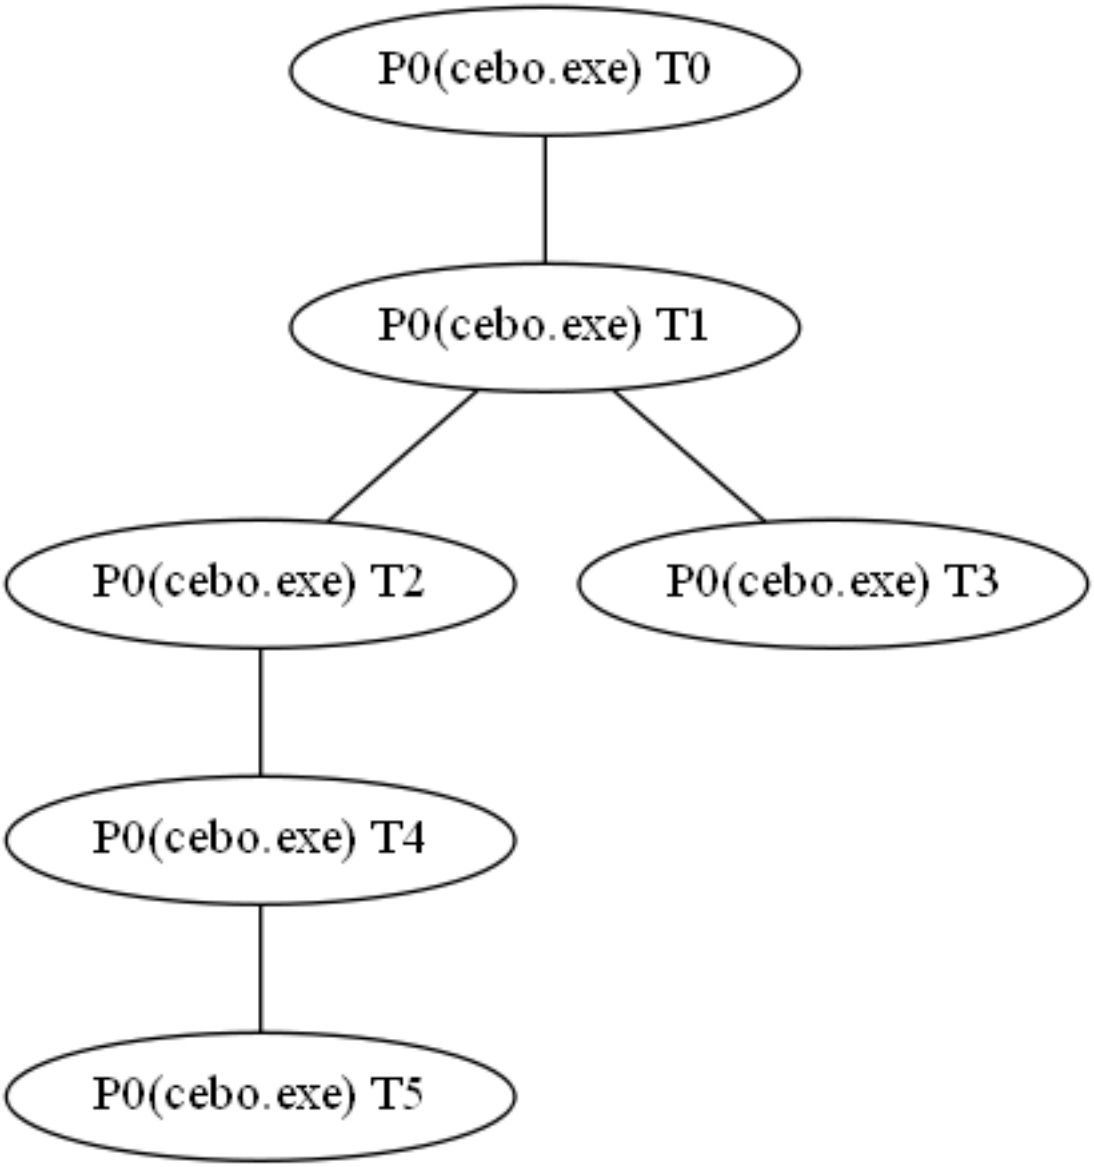
Threads tree

The following tree represents sample's threads. T<index> is an alias for sample's threads (numeration is done in the order of threads creation). P<index> is an alias for processes owning sample's threads.



Running processes

Here it is the list of running processes after sample execution.

Processes with sample' threads

- Name cebo.exe Alias P0

Other processes

- Name System
- Name smss.exe
- Name csrss.exe
- Name wininit.exe
- Name csrss.exe
- Name winlogon.exe

Most interesting actions

The following list it's a collection of the most interesting events captured. This list is ordered by the score assigned to the event. In the section "Threads behavioural information" it's possible to find all the actions performed by each sample's thread ordered chronologically.

- RegCreateKey (HKCU\\Software\\Microsoft\\GDIPlus Desired Access: Read/Write, Disposition: REG_OPENED_EXISTING_KEY)

Most interesting strings

The following list it's a collection of the most interesting strings found in the sample's modules code or data. A complete list of strings for each sample's module can be found in the section "Sample's unpacked / injected modules."

Connections and readable network traffic

The analysis environment captures network traffic happened while sample execution. It classifies the traffic and tries to extract the most significant parts from the communications data.

In this section it's possible to find parts of the communication data that are easier to be read.

Threads behavioural information

In this section it's possible to find information about sample's threads, such as the actions performed by each sample's thread ordered chronologically.

• Thread T0 (in process P0, cebo.exe) description

• Thread's childs

- Thread T1 (in process P0, cebo.exe)

• Thread' events

- Thread Create (Thread ID: T1)

• Thread T1 (in process P0, cebo.exe) description

• Thread's childs

- Thread T2 (in process P0, cebo.exe)
- Thread T3 (in process P0, cebo.exe)

• Thread' events

- Thread Create (Thread ID: TUNKALIAS)
- Thread Create (Thread ID: TUNKALIAS)
- Thread Create (Thread ID: T2)
- RegCreateKey (HKCU\\Software\\Microsoft\\GDIPlus Desired Access: Read/Write, Disposition: REG_OPENED_EXISTING_KEY)
- Thread Create (Thread ID: T3)
- Thread Create (Thread ID: TUNKALIAS)
- Thread Create (Thread ID: TUNKALIAS)

• Thread T2 (in process P0, cebo.exe) description

• Thread's childs

- Thread T4 (in process P0, cebo.exe)

• Thread' events

- Thread Create (Thread ID: T4)

• Thread T3 (in process P0, cebo.exe) description

• Thread's childs

• Thread' events

• Thread T4 (in process P0, cebo.exe) description

• Thread's childs

- Thread T5 (in process P0, cebo.exe)

- **Thread' events**

  - Thread Create (Thread ID: T5)

• Thread T5 (in process P0, cebo.exe) description

- **Thread's childs**

- **Thread' events**

  - Thread Create (Thread ID: TUNKALIAS)

Malware processes' network events

The analysis environment tries to capture and collect network actions performed by sample's threads.

Process P0 (cebo.exe)'s network events

- TCP Connect (javi-PC.localdomain:dynport-> 123.125.114.215:http (0))
- TCP Send (javi-PC.localdomain:dynport-> 123.125.114.215:http (120))
- TCP Connect (javi-PC.localdomain:dynport-> 123.125.114.215:http (0))
- TCP Send (javi-PC.localdomain:dynport-> 123.125.114.215:http (70))
- TCP Receive (javi-PC.localdomain:dynport-> 123.125.114.215:http (1448))
- TCP Receive (javi-PC.localdomain:dynport-> 123.125.114.215:http (1448))
- TCP Receive (javi-PC.localdomain:dynport-> 123.125.114.215:http (1400))
- TCP Receive (javi-PC.localdomain:dynport-> 123.125.114.215:http (1460))
- TCP Receive (javi-PC.localdomain:dynport-> 123.125.114.215:http (273))
- TCP Receive (javi-PC.localdomain:dynport-> 123.125.114.215:http (975))

Sample's unpacked / injected modules

In this section it's possible to find information about sample's modules, such as the rich signatures, strings, yara rules matching the module,...

The analysis environment performs an heuristic search trying to find sample's injected or unpacked modules in memory, dumping and analyzing them.

• Module 1 (probably unpacked / injected by the sample)

• Module 1 rich signatures
