Yara matches

The following yara rules have matched injected or unpacked modules's code or data areas.

- VC8_Microsoft_Corporation ()
- Microsoft_Visual_Cpp_8 ()
- IsPE32 ()
- IsWindowsGUI ()
- HasRichSignature (Rich Signature Check)
- DebuggerException__SetConsoleCtrl ()
- Check_OutputDebugStringA_iat ()
- anti_dbg (Checks if being debugged)
- screenshot (Take screenshot)
- keylogger (Run a keylogger)
- win_files_operation (Affect private profile)
- win_hook (Affect hook table)
- without_attachments (Rule to detect the no presence of any attachment)
- without_images (Rule to detect the no presence of any image)
- without_urls (Rule to detect the no presence of any url)
- contentis_base64 (This rule finds for base64 strings)
- Str_Win32_Winsock2_Library (Match Winsock 2 API library declaration)
- Str_Win32_Wininet_Library (Match Windows Inet API library declaration)
- Str_Win32_Internet_API (Match Windows Inet API call)
- Str_Win32_Http_API (Match Windows Http API call)
- HasOverlay (Overlay Check)
- network_http (Communications over HTTP)
- network_dga (Communication using dga)
- escalate_priv (Escalade priviledges)
- win_registry (Affect system registries)
- win_token (Affect system token)
- with_urls (Rule to detect the presence of an or several urls)
- maldoc_find_kernel32_base_method_1 ()
- Big_Numbers0 (Looks for big numbers 20:sized)
- RIPEMD160_Constants (Look for RIPEMD-160 constants)
- SHA1_Constants (Look for SHA1 constants)
- BASE64_table (Look for Base64 table)

Threads tree

The following tree represents sample's threads. T<index> is an alias for sample's threads (numeration is done in the order of threads creation). P<index> is an alias for processes owning sample's threads.

Running processes

Here it is the list of running processes after sample execution.

Processes with sample' threads

- Name cebo.exe Alias P0
- Name spbhg Alias P1
- Name cmd.exe Alias P2

Dns queries

Connections and readable network traffic

The analysis environment captures network traffic happened while sample execution. It classifies the traffic and tries to extract the most significant parts from the communications data.

In this section it's possible to find parts of the communication data that are easier to be read.

Malware processes' network events

The analysis environment tries to capture and collect network actions performed by sample's threads.

Sample's unpacked / injected modules

In this section it's possible to find information about sample's modules, such as the rich signatures, strings, yara rules matching the module,...

The analysis environment performs an heuristic search trying to find sample's injected or unpacked modules in memory, dumping and analyzing them.

• Module 1 (probably unpacked / injected by the sample)

• Module 1 rich signatures

• If You have really valuable data, you better not waste your time, because there is no other way to get your files, except make a payment.

• So, there are two ways you can choose: wait for a miracle and get your price doubled, or start obtaining BTC NOW, and restore your data easy way.
• What do I do ?
• Decrypting of your files is only possible with the help of the private key and decrypt program, which is on our secret server.
• All your files were encrypted with the public key, which has been transferred to your computer via the Internet.
• Specially for your PC was generated personal RSA2048 KEY, both public and private.
• How did this happen ?
• it is the same thing as losing them forever, but with our help, you can restore them.
• This means that the structure and data within your files have been irrevocably changed, you will not be able to work with them, read them or see them,
• What does this mean ?
• All of your files were protected by a strong encryption with RSA-2048.

• IMPORTANT INFORMATION:
• 4. Follow the instructions on the site.
• 3. Type in the address bar: vr6g2curb2kcidou.onion/%S
• 2. After a successful installation, run the browser and wait for initialization.
• If for some reasons the addresses are not available, follow these steps:
• For more specific instructions, please visit your personal home page, there are a few different addresses pointing to your page below:
• If You have really valuable data, you better not waste your time, because there is no other way to get your files, except make a payment.
• So, there are two ways you can choose: wait for a miracle and get your price doubled, or start obtaining BTC NOW, and restore your data easy way.
• What do I do ?
• Decrypting of your files is only possible with the help of the private key and decrypt program, which is on our secret server.

• All your files were encrypted with the public key, which has been transferred to your computer via the Internet.

• Specially for your PC was generated personal RSA2048 KEY, both public and private.

• How did this happen ?

• it is the same thing as losing them forever, but with our help, you can restore them.

• This means that the structure and data within your files have been irrevocably changed, you will not be able to work with them, read them or see them,

• What does this mean ?

• All of your files were protected by a strong encryption with RSA-2048.

• What happened to your files ?

• 3. Type in the address bar: vr6g2curb2kcidou.onion/%S
• 2. After a successful installation, run the browser and wait for initialization.
• If for some reasons the addresses are not available, follow these steps:
• For more specific instructions, please visit your personal home page, there are a few different addresses pointing to your page below:
• If You have really valuable data, you better not waste your time, because there is no other way to get your files, except make a payment.
• So, there are two ways you can choose: wait for a miracle and get your price doubled, or start obtaining BTC NOW, and restore your data easy way.
• What do I do ?
• Decrypting of your files is only possible with the help of the private key and decrypt program, which is on our secret server.
• All your files were encrypted with the public key, which has been transferred to your computer via the Internet.
• Specially for your PC was generated personal RSA2048 KEY, both public and private.
• How did this happen ?
• it is the same thing as losing them forever, but with our help, you can restore them.
• This means that the structure and data within your files have been irrevocably changed, you will not be able to work with them, read them or see them,
• What does this mean ?

- All of your files were protected by a strong encryption with RSA-2048.
- What happened to your files ?
