Analysis report for sample: b69d2f08dc4156b643efa0f5ba193980

This report has been generated by a set of tools for semi-supervised behavioral analysis of executables.

More information about these reports at **http://www.vallejo.cc**.

This work is licensed under a Creative Commons Attribution 4.0 International License. To view a copy of this license visit http://creativecommons.org/licenses/by/4.0/.

Report classification: 2422 (indicates the level of interest of the report, based on the amount of information collected about the sample).

Threads tree

The following tree represents sample's threads. T<index> is an alias for sample's threads (numeration is done in the order of threads creation). P<index> is an alias for processes owning sample's threads.

Running processes

Here it is the list of running processes after sample execution.

Processes with sample' threads

- Name cebo.exe Alias P0

Other processes

- Name System
- Name smss.exe
- Name csrss.exe
- Name wininit.exe
- Name csrss.exe
- Name winlogon.exe

Most interesting actions

The following list it's a collection of the most interesting events captured. This list is ordered by the score assigned to the event. In the section "Threads behavioural information" it's possible to find all the actions performed by each sample's thread ordered chronologically.

Most interesting strings

The following list it's a collection of the most interesting strings found in the sample's modules code or data. A complete list of strings for each sample's module can be found in the section "Sample's unpacked / injected modules."

Involved hosts

- 192.168.133.1:5355
- 192.168.133.220:50909
- 192.168.133.220:54396

Dns queries

Connections and readable network traffic

The analysis environment captures network traffic happened while sample execution. It classifies the traffic and tries to extract the most significant parts from the communications data.

In this section it's possible to find parts of the communication data that are easier to be read.

- **udp 192.168.133.1:5355 ---> 192.168.133.220:54396**

  in-addr[...]arpa[...]in-addr

- **udp 192.168.133.1:5355 ---> 192.168.133.220:50909**

  arpa

Threads behavioural information

In this section it's possible to find information about sample's threads, such as the actions performed by each sample's thread ordered chronologically.

- **Thread T0 (in process P0, cebo.exe) description**

  - **Thread's childs**

  - **Thread' events**

    - Thread Create (Thread ID: TUNKALIAS)

Malware processes' network events

The analysis environment tries to capture and collect network actions performed by sample's threads.

Sample's unpacked / injected modules

In this section it's possible to find information about sample's modules, such as the rich signatures, strings, yara rules matching the module,...

The analysis environment performs an heuristic search trying to find sample's injected or unpacked modules in memory, dumping and analyzing them.

• Module 1 (probably unpacked / injected by the sample)

• Module 1 rich signatures

• Module 1 yara matches

• Module 1 strings

• Module 1 most interesting strings

• CorExitProcess
• Unknown exception
• Program:
• Runtime Error!
• <program name unknown>
• Microsoft Visual C++ Runtime Library
• - floating point support not loaded
• R6002
• - not enough space for arguments
• R6008
• - not enough space for environment
• R6009
• Please contact the application's support team for more information.
• This application has requested the Runtime to terminate it in an unusual way.
• - not enough space for thread data
• R6016
• - unexpected multithread lock error
• R6017
• - unexpected heap error
• R6018
• - unable to open console device
• R6019
• - not enough space for _onexit/atexit table
• R6024
• - pure virtual function call
• R6025
• - not enough space for stdio initialization
• R6026
• - not enough space for lowio initialization
• R6027
• - unable to initialize heap
• R6028
• - CRT not initialized
• R6030
• This indicates a bug in your application.
• - Attempt to initialize the CRT more than once.
• R6031
• - not enough space for locale information
• R6032
• This indicates a bug in your application. It is most likely the result of calling an MSIL-compiled (/clr) function from a native constructor or from DllMain.
• - Attempt to use MSIL code from this assembly during native code initialization

- R6033
- Please contact the application's support team for more information.
- An application has made an attempt to load the C runtime library incorrectly.
