Analysis report for sample: 96358a02fac2c0ddd1273885c14c1861

This report has been generated by a set of tools for semi-supervised behavioral analysis of executables.

More information about these reports at **http://www.vallejo.cc**.

This work is licensed under a Creative Commons Attribution 4.0 International License. To view a copy of this license visit http://creativecommons.org/licenses/by/4.0/.

Report classification: 647338 (indicates the level of interest of the report, based on the amount of information collected about the sample).

Index

-

Virustotal url

- https://virustotal.com/es/file/6820f16c278a924864230defac748ad76abd9bbf763b6b75ab8e1f72136a521e/analysis

Yara matches

The following yara rules have matched injected or unpacked modules's code or data areas.

- IsPE32 ()
- IsWindowsGUI ()
- HasOverlay (Overlay Check)
- escalate_priv (Escalade priviledges)
- win_registry (Affect system registries)
- win_token (Affect system token)
- win_files_operation (Affect private profile)
- without_attachments (Rule to detect the no presence of any attachment)
- without_images (Rule to detect the no presence of any image)
- with_urls (Rule to detect the presence of an or several urls)
- contentis_base64 (This rule finds for base64 strings)

Threads tree

The following tree represents sample's threads. T<index> is an alias for sample's threads (numeration is done in the order of threads creation). P<index> is an alias for processes owning sample's threads.

Running processes

Here it is the list of running processes after sample execution.

Processes with sample' threads

- Name cebo.exe Alias P0

Other processes

- Name System
- Name smss.exe
- Name csrss.exe
- Name wininit.exe
- Name csrss.exe
- Name winlogon.exe
- Name services.exe
- Name lsass.exe
- Name lsm.exe
- Name svchost.exe

Most interesting actions

The following list it's a collection of the most interesting events captured. This list is ordered by the score assigned to the event. In the section "Threads behavioural information" it's possible to find all the actions performed by each sample's thread ordered chronologically.

Connections and readable network traffic

The analysis environment captures network traffic happened while sample execution. It classifies the traffic and tries to extract the most significant parts from the communications data.

In this section it's possible to find parts of the communication data that are easier to be read.

• tcp 192.168.133.145:49196 ---> 54.154.177.35 (os.telechargercdn.com) :80

Threads behavioural information

In this section it's possible to find information about sample's threads, such as the actions performed by each sample's thread ordered chronologically.

• Thread T0 (in process P0, cebo.exe) description

• Thread's childs

Sample's unpacked / injected modules

In this section it's possible to find information about sample's modules, such as the rich signatures, strings, yara rules matching the module,...

The analysis environment performs an heuristic search trying to find sample's injected or unpacked modules in memory, dumping and analyzing them.

• Module 1 (probably unpacked / injected by the sample)

• Module 1 rich signatures

• Module 1 yara matches

- IsPE32 ()
- IsWindowsGUI ()
- HasOverlay (Overlay Check)
- escalate_priv (Escalade priviledges)
- win_registry (Affect system registries)
- win_token (Affect system token)
- win_files_operation (Affect private profile)
- without_attachments (Rule to detect the no presence of any attachment)
- without_images (Rule to detect the no presence of any image)
- with_urls (Rule to detect the presence of an or several urls)
- contentis_base64 (This rule finds for base64 strings)
